

# HEALTHY MODERN HYOUUMAN

“ *HEALTHY MODERN HYOUUMAN* is a trailblazing book for anyone seeking optimal health. Billadeau leads us through unsuspected roadblocks with history lessons, humor, and a dose of tough love. He then paves the path for uncomplicated health while reminding us of our innate common sense. Get ready for a wild ride of truth.

– **HOLLY ROLLINS, Ed.M**  
Harvard University

Scott is a former university professor, serial entrepreneur, member and elected ‘auditor’ of the Triple Helix Association (Industry • University • Government), and a passionate health advocate. After working throughout the U.S. and around the world, he has decades of direct, hands-on experience in all corners of our modern society. While he enjoys seeing the forest through the trees, he equally enjoys seeing the galaxy through the stars. Science, math, and intuition are the lenses in which he views the world.

Scott resides in Missoula, Montana with his wife, son, and daughter (in that order).

## THIS IS NOT JUST ANOTHER HEALTH BOOK...

In fact, this book was researched and written as no other health book ever has been. The author has traversed the entire landscape of medicine, modern society, and how to carve out a healthy life from an otherwise toxic world. He climbed every mountain, forged every sea, entered every valley, and even far off caves – mining knowledge nuggets and unearthing a treasure trove of heretofore, unconnected information, understandings, and wisdom.

This book (series) will change the way you view health, society, and the universe. Most importantly, it will change Y-O-U for the better.

## YOUR BEST POSSIBLE LIFE AWAITS YOU INSIDE!
